when a due date is set on a card by me
'moved' only triggers when the card already had a due date, while 'set' triggers regardless.
when I enter a card name containing a date set due on the date
This automation will automatically add due dates to your cards when you enter a temporal indication in the name or description, e.g. tomorrow at 10, next tuesday, april 15, 8/5/19, in two working days, before the last Friday of the month, etc.
Note: This will only trigger when you create a card, or modify its name or description. It will not work retro-actively for existing cards on the board.
